Fluted / Beaded filler moulding nests with caps and corbel.

Filler moulding is fluted on one side and beaded on the other side. This provides the ease of perfect alignment when nested with a cap or corbel having a matching fluted or beaded back. These pieces are made from high quality solid lumber. Availabe in cherry, maple and red oak. See filler moulding below, caps on page 510 and corbels on pages 511-514
