## Screw-on

Use \#6 wood screws.

## Press-in

Pre-attached $\varnothing 8$ dowels installed with Blum press-in tool or MINIPRESS with COMPACT insertion ram.

## Mounting plate attachment

## Minimum reveal

A minimum reveal per door is required to keep the door from binding and varies depending on door thickness.

See minimum reveal table for each hinge.

## Hinge cup centerpoint

Hinge cup centerpoint and MINIPRESS setback position is 20.5 (13/16") for COMPACT CLIP hinges.

NOTE: Maximum door thickness 3/4"

## Hinges per door

This chart can serve as a guide for determining the number of hinges per door. Note that door weight can also determine the number of hinges required.

[^0]
## Hinges

## COMPACT CLIP

Features

## 4blum

## Clip features

With COMPACT CLIP, doors can be removed and reattached quickly and tool free. Not only does this save installers time on the jobsite, it also reduces the risk of damage to the cabinet frame.

## Hinge attachment

Step 1: Slide hinge onto CLIP plate until hinge clips in place.

## Hinge removal

Step 1: Locate CLIP release lever on back of hinge(A) and press down to release(B).

Step 2: While the CLIP lever is released, pull forward on hinge / door to remove from cabinet.

## Cam height adjustment

Not only does the height setting remain unchanged as doors are attached and removed, a cam height adjustment is now available. This allows for the maximum adjustment range without needing to be centered in an elongated hole.

All adjustments now have markings stamped on the hinge near their corresponding screw head.

## Pre-mounted screw

The COMPACT CLIP hinge comes with a pre-mounted screw for quick, easy screw head visibility saving time with improved accuracy.

## Three-dimensional cam adjustment

## BLUMOTION Deactivation

## Deactivation switch on the hinge cup

For small or light doors, the BLUMOTION can be deactivated on one of the hinges. COMPACT CLIP comes in the activated position, marked with a "I". The deactivated position is marked with a "0".

The door must be closed once for the deactivation to be complete. To reactivate, move switch back to the original position "I".

## Features

- Utilizes Blum's CLIP technology

- BLUMOTION integrated into the hinge cup
- Deactivation switch for small/light doors
- Overload safety feature
- Three-dimensional cam adjustment with directional arrows for easy and precise adjustability
- 7/16" cup depth
- Edge mount available in $1 / 2$ " overlay
- Pre-mounted wood screw for time-saving and precise installation
- Custom logo cover cap available

## Minimum Reveal

NOTE: Maximum door thickness 3/4"

NOTE: COMPACT BLUMOTION comes in the activated position, marked with a "I" - the deactivated position is marked with a "0"
