

STANDOFFS MOUNTING KIT

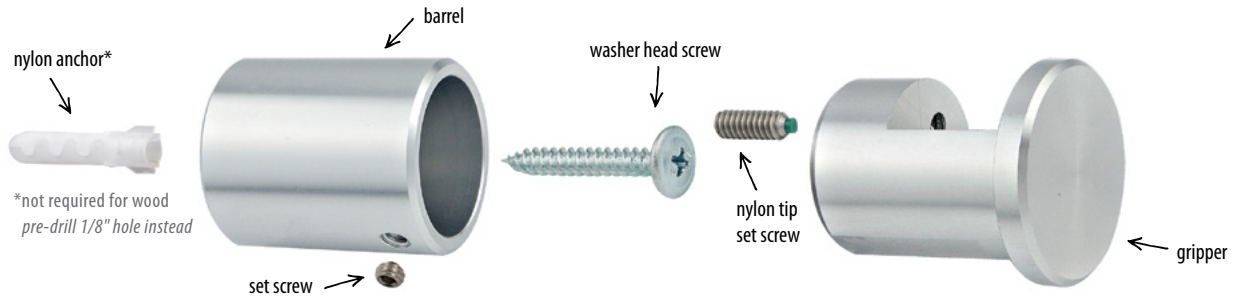

Everything you need to mount signage, artwork, posters or awards.

Adjustable Edge Grip

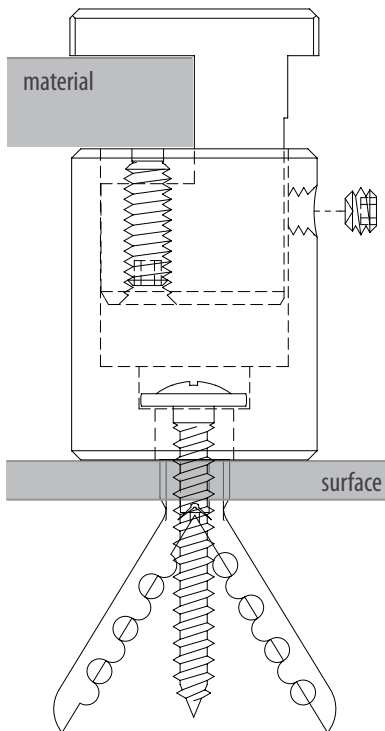

Installation Instructions

Here's what you'll find in your kit:

NOTE: There is a tip on the base of the gripper to dimple the mounting location on softer surfaces such as drywall and wood. For masonry, use a piece of masking tape as a pad to receive the mark.

Watch our how-to videos: standoffsystems.com/howto

- 1 Mount the **grippers** to your panel by placing the grippers on the edges and tightening the **nylon tips** against back of the panel.
- 2 Hold the panel and grippers level against the wall and press to create dimpled marks on your mounting surface.
- 3 Pre-drill 1/4" holes in your surface, then insert **nylon anchors** into the holes and tap them flush.
- 4 Mount **barrels** to wall with the **washer head screws**, then insert the grippers and tighten **set screws**.

TIP 1: For material over 1/2" thick, temporarily remove nylon tip set screws to make dimpled marks.

TIP 2: Align the barrels so the flat side of the gripper will line up with the barrel's set screw hole.
